**See reverse for more details** →

## CSSCloud Culture

Of course there's more to us than 'tech', we are a social bunch too, and we often hold events and gatherings. From charity 5k events (don't worry, no athletic ability required!) to bowling, golf and other extracurricular activities. Also, at CSSCloud there is such a thing as a free lunch as we often have bbq's, pizzas, and of course healthy alternatives such as fruit and veg.

Working life is no longer all about 9-5 working from an office and we like to practice what we preach and ensure that secure, flexible, remote working capability is available to all. For those that do spend time in the office we have just expanded our staff area, which is fully equipped with games consoles, a full size pool table, darts, other games and a garden with picnic style tables and landscaping.

## CSSCloud Expertise

As a certified Microsoft Gold partner we have been recognised to provide the highest levels of skill and competence to every system or device that we support. Security is evolving constantly so the protection and defence of our clients networks and data is the top priority.

We are Cyber Essentials Plus certified and we assist and educate our customers constantly, many of whom have achieved the same level of cyber essentials certification. Watchguard firewalls and network devices are key to our IT solutions and due to our technical expertise we are a Gold Partner.

We continually invest in the technical infrastructure that supports our company and the solutions we provide. From new IT documentation systems, monitoring and management applications, we have a forward thinking approach to the technologies we use and support.
